ENVIRONMENT, CHAIRMAN

July 20, 1990

Honorable William K. Reilly, Administrator
Environmental Protection Agency
401 M Street
Washington, D.C. 20460

Dear Mr. Reilly:

As chairman of the Natural Resources and Environment Committee of the Georgia House of Representatives, I am keenly aware of the concerns of many about the air quality of our region and with this in mind, we are constantly in search of ways to reduce air pollution.

I have been informed that a performance additive known as HiTEC 3000 may present a real opportunity to substantially improve air quality in the United States.

According to background information I have reviewed, this additive seems to have a significant impact in reducing NOx and, therefore, helps in reducing smog.

It is critical that any possible way to improve our nation's air quality be examined to the fullest and it is my hope that this additive will be given every possible consideration by the Environmental Protection Agency.

Sincerely,

Robert Patten
